

SHUFFL

design Anne Boysen

SHUFFL

design Anne Boysen

Inspireret af musikkens verden, hvor kombinationen af forskellige rytmer udgør et æstetisk og harmonisk udtryk opstod navnet SHUFFL. SHUFFL er en modulsofa med fokus på design, håndværk og rytme. Med SHUFFL er der uendelige muligheder.

Systemet kan sammensættes på utallige måder, hvilket gør det muligt at imødekomme mange forskellige funktioner og krav til indretning i det offentlige rum. Systemets moduler differentierer med 22 cm, hvilket gør systemet fleksibelt at tilpasse forskellige omgivelser.

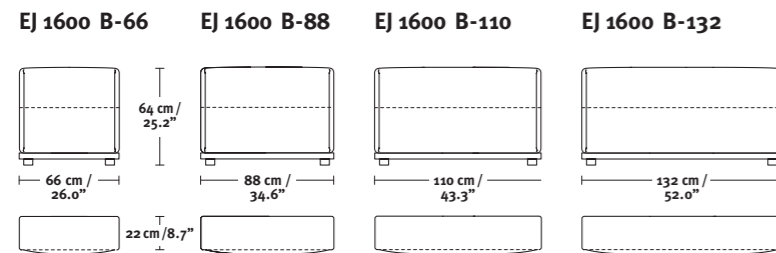

From the world of music, where the combination of different rhythms equals an aesthetic and harmonic expression, came the name 'SHUFFL'. SHUFFL is a modular sofa with a focus on design, craftsmanship and rhythm. With SHUFFL the possibilities are endless.

The system can be combined in countless ways, which make it possible to accommodate many different functions and demands for interior decoration of public spaces. The modules of the system differ by 22 cm, which make the system flexible when adjusting to different surroundings.

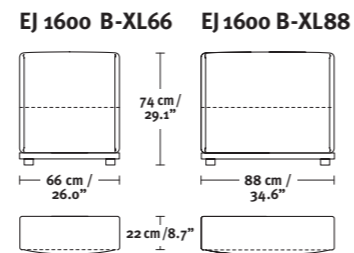

MODULES

The SHUFFL sofa can combine several different modules to form an asymmetrical landscape with the possibility of featuring a side table, a lamp, a power outlet and a planter box that may also serve as a table or a room divider. Inside the table module is a concealed storage space for keeping folders, papers etc. neatly out of sight. Both the base, the planter box and the table are made in oak, a reflection of Boysen's preference for pure, Nordic materials. The back on the sofa is available in two heights to accommodate different user needs.
