v2.0

Nest System Table

The Nest System Tables, a distinguished modular table solution configured to turn and bend, was the first modular extension to the popular +Halle Nest series. The collection of high and low sofas, chairs and tables is loved by many for its mix of casual and productive behaviours—above all its adaptable to change. From the series use in public spaces comes a new set of behavioural learnings: insisting on a high worktop, individual space, and a sense of scale.

With two heights and two widths, the Nest System Table collection continues to evolve in terms of adaptability, scalability and opportunities.

We continuously explore the ability for a table to become an architecture tool. The purpose of the Nest System table is to create a sense of community around a table in a similar fashion we often gather in a breakout space. The initial inspiration for the Nest System Table came from an observation; a need for public areas to combine work and everything else. The original solution was a large centre table that does more than just go in a straight line, structuring a playful space for a large group of individuals. The additional “Table 100” continues to build on that observation, while also addressing the needs in smaller spaces, more intimate surroundings or less formal environments or settings.

The traditional open office model may be struggling, but this modular table system represents something different within the public space, standing tall, like a landmark of common ground. There is a presence of particularity, of detailed experience in the table.

The table is twisting, turning and moving in different directions, but the symbolism of everyone sitting together is powerful today, even if we need more space and flexibility. A few years ago you would design an office to last for five years, today, it is down to three years. The turnaround speed of office furniture is excessive and not sustainable. As a matter of resilience, this table system is responsive to change, providing the ability to scale up and down, using a simple architectural configuration or modular refresh.

Nest System Table does not only offer architectural freedom in terms of size and scale, but also functionality; Create work stations along walls in corridors or open spaces with the additional wall mounts and invite passers to share knowledge or simply work in a different setting. Or add integrated electrical plug solution for power outlets or integrated lighting. With Nest System Tables the opportunities are endless and suddenly everything is linked: space and the people, coming together in a perfect ensemble.

The design solution of the System Table derives from experience that the design team had from developing the entire Nest series. ‘We see how the Nest series has been integrated into work spaces and the productivity that happens around them. Having a comfortable chair at standing height to lean on, sit in, and stand next to is more dynamic. We enhanced this experience with the System Table,’ says Jonas Pettersson, Co-founder and CEO at Form Us With Love.’

Today, the public space and the workspace are, in some sense, more reliant on each other. In the past decade we have seen the domestic influence on the workspace, however, the learning from our public environments has become increasingly important. ‘With the Nest System Table we are applying the need for something that is not linear, in order for multiple tables to be created using one system, it is a series of parts for your own creation,’ Halle concludes. There is a level of play in the Nest System Tables that is unmatched in the market, a call for the creativity to be brought back, as a way to create landmarks within communal spaces.

Specifications

| Modules | Lenght | Width | Height | Footrest height |
|-----------------------------------|--------|--------|--------|-----------------|
| System Low Table - End | 105 cm | 140 cm | 70 cm | |
| System Low Table - Center | 90 cm | 140 cm | 70 cm | |
| System Low Table - Angle 45° | 45° | 140 cm | 70 cm | |
| System High Table - End | 105 cm | 140 cm | 100 cm | 30 cm |
| System High Table - Center | 90 cm | 140 cm | 100 cm | 30 cm |
| System High Table - Angle 45° | 45° | 140 cm | 100 cm | 30 cm |
| System Low Table 100 - End | 105 cm | 100 cm | 70 cm | |
| System Low Table 100 - Center | 90 cm | 100 cm | 70 cm | |
| System Low Table 100 - Angle 45° | 45° | 100 cm | 70 cm | |
| System High Table 100 - End | 105 cm | 100 cm | 100 cm | 30 cm |
| System High Table 100 - Center | 90 cm | 100 cm | 100 cm | 30 cm |
| System High Table 100 - Angle 45° | 45° | 100 cm | 100 cm | 30 cm |

Designed by Form Us With Love

Material
 Table Top: Fenix Laminate / Oak veneer, MDF
 Base: Steel
 Feet: PA

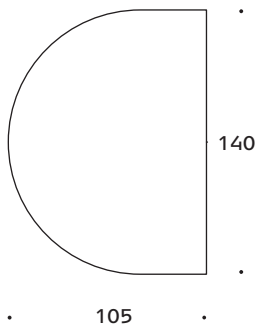

Add-ons
 Integrated power outlets or integrated lighting
 Wall mount

Tests & certificates FSC®-163859
